**Subject:** Another request - Digitize National Wetland Inventory Maps

Hi James,

I have a separate request. Can you digitize the National Wetland Inventory maps? The maps are only available in paper format. And in the wisdom of government the Alaska maps are not available in Alaska. The Fish and Wildlife Service has contracted the maps out to vendors, which are identified on the NWI website. I believe that the vendor for Alaska is the University of South Dakota.

Specifically, the area around Pebble would be useful to have in a digital format - the headwaters of the South Fork Koktuli, North Fork Koktuli (including the valley of TSF G) and Upper Talarik Creek. I don't have a good sense about how much work this would be, so please let me know if this is not a realistic request.

Thanks  
Phil
